IN-SYNC DISPLAYS

Multiple screens playing synchronized content to create immersive brand environments. Ideal for experience centers and sales galleries to present coordinated visuals such as project journeys, lifestyle themes, and location advantages.

TYPE: MULTI-SCREEN SYNCED CONTENT PLAYBACK

SALES GALLERIES
Unified screens narrating the complete project story

EXPERIENCE CENTERS
Immersive visuals that build buyer confidence

PROJECT LAUNCHES
High-impact synchronized brand reveals

LOCATION SHOWCASES
Connectivity, landmarks & growth zones

DEVELOPER SHOWROOMS
Multiple projects, one seamless story

SENSOR-BASED INTERACTIVE SIGNAGE

IoT-enabled interactive solutions that respond to touch, motion, or object interaction. Used to explore amenities, sustainability features, smart home concepts, and project USPs through experiential engagement.

TYPE: PRESS AND LEARN, LIFT AND LEARN, PLACE AND LEARN, STEP AND LEARN

AMENITIES DISCOVERY
Explore lifestyle spaces through touch

SMART LIVING ZONES
Interactive demos of smart home features

UNIT COMPARISON
Compare layouts, sizes & benefits instantly

GREEN LIVING
Engaging insights into sustainable features

SELF-GUIDED JOURNEYS
Learn at your pace, decide with clarity

DIGITAL VIDEO PROSPECTUS

A premium alternative to printed brochures. A sleek video card that auto-plays project highlights, walkthroughs, amenities, and brand stories when opened. Ideal for high-value prospects, channel partners, and investor presentations.

DIGITAL VIDEO PROSPECTUS (5” & 7” SCREENS) WITH CUSTOMIZED DESIGN & BUTTON - BASED CONTENT TRIGGERS

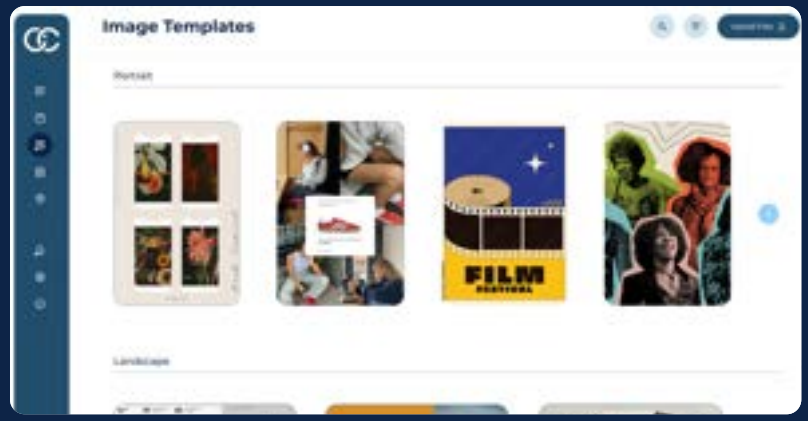
SITE VISIT TAKEAWAY
A complete project experience to go

PREMIUM LEADS
High-impact video brochure

CHANNEL PARTNERS
Professional pitching made easy

NRI BUYERS
Remote walkthroughs with clarity

LUXURY PROJECTS
A refined alternative to print



CONTENT MANAGEMENT SYSTEM

A centralized, cloud-based CMS to manage content across multiple sales offices, sites, and exhibitions. Schedule project updates, pricing visuals, offers, and campaigns remotely with complete device control.

- Multi-Screen Management
- Real-Time Content Scheduling
- Drag & Drop Editor
- Secure Login & Permissions
- Encrypted Connections
- Offline Playback
- Report & Analytics

CANVAS CTRL – OFFLINE CMS

An on-site CMS designed for site offices and remote project locations with limited internet connectivity. Enables secure, offline content updates via mobile devices, ensuring continuous communication.

TYPE: OFFLINE CONTENT MANAGEMENT SYSTEM

SITE OFFICES
Update notices and schedules without internet

REMOTE PROJECT LOCATIONS
Maintain communication in low-connectivity zones

SAFETY & COMPLIANCE
Display critical instructions at all times

FIELD OPERATIONS
Change content instantly via mobile devices

CUSTOM INTEGRATIONS

Seamless API integrations with CRM, ERP, inventory systems, booking platforms, and analytics dashboards. Enables real-time availability, pricing updates, lead data synchronization, and performance tracking across digital displays.

Integration Types: CRM, ERP, Inventory Systems, Booking Platforms, AQI, Analytics Dashboards

LIVE INVENTORY
Real-time unit status on display

DYNAMIC PRICING
Auto-updated rates & offers

LEAD SYNC
Direct CRM integration from screens

SALES INSIGHTS
Track engagement & performance

BOOKING STATUS
Live updates from sales systems

SUPPORT SERVICES

End-to-end support ensures reliable operation across all real estate deployments.

Front-end Support: On-site installation, staff training, device health checks, troubleshooting, and replacements.

Back-end Support: CMS maintenance, content scheduling, remote monitoring, reporting, and uptime management.
